PRODUCT DETAILS

If you're looking for a great digital radio or portable Bluetooth speaker, Pop Midi with Bluetooth from our new Pop family gives you the best of both worlds. Listen to your favourite digital radio station or use Bluetooth to stream your favourite song, playlist or internet radio station wirelessly from your mobile or tablet. Measuring only 17cm high, 9cm wide and 10cm deep, Pop Midi with Bluetooth is perfect for most bedside tables or kitchen worktops. Just like our other recent digital radios, Pop Midi with Bluetooth is Digital Tick approved so you can rest assured that you're ready for any future FM to Digital Radio switchover. Features a highly visible clock, two alarms, kitchen timer and DAB digital and FM radio. For portable listening, Pop Midi with Bluetooth takes an optional eco-friendly ChargePAK D1 or the option to use regular AA alkaline batteries.

Your music, no wires

Built-in Bluetooth turns your radio into a great wireless speaker – just choose your favourite music, streaming service or internet radio station and play it direct from your phone or tablet without trailing wires.

Looks good, sounds great

Pop Midi with Bluetooth doesn't just look good. Like all our other Pure digital radio's, Pop Midi with Bluetooth has been engineered and hand tuned by our audio experts in the UK to ensure the best possible sound.

Compact for portable listening

Pop Midi with Bluetooth's compact size makes it really convenient to listen to your favourite radio show wherever you want, whether that's the kitchen, study or bedroom. With the option to fit a ChargePAK D1 rechargeable battery pack or regular AA alkaline batteries, you can also listen to your favourite radio station in the garden or take it with you on holiday.

Switch on to digital radio

DAB digital radio brings you high-detail digital-quality sound and lots of stations (many exclusive to digital). As well as more choice, the large clear displays on our DAB digital radios let you find out more about the station you are listening to, including the title of a playing track, the name of the radio show and much more. Digital radios automatically find all your available stations and let you select them by

name, and there's also FM for any stations that have not yet gone digital.
